

## MINUTES

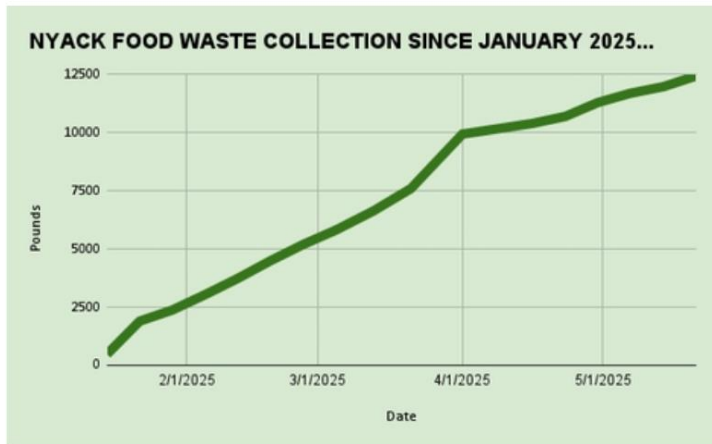

Nyack Climate Smart Committee Meeting June 3, 2025

### Waste Management

#### Food waste program

Marcy gave an overview of the discussion the current status of the food scrap program in Nyack. DPW not uses the compactor truck to haul scraps to Hillburn. We have questions that we hope to get answers about from Rockland Green related to how to expand the programs and what the future holds for expanding county wide and getting to curbside pickup.

Andy has arranged have food waste totals go out in the Village newsletter.

#### Door hanger campaign

Marcy described tentative plans for a complex outreach campaign for reduction of waste that involved getting doorhangers distribute that would entice homeowners to engage. The group brainstormed and decided that doorhangers would not be the way to do this, and that a simpler, more focused campaign focused on driving up participation in the food scrap program using yard signs would be better.

Marcy to circulation google doc for shared input.

Andrew to gather info on yard sign source/prices.

Meeting adjourned 6..45 pm.

Next meeting 7/1/25
